

Technical Data Sheet

Fertenol

High-grade pickling and derusting agent

Properties:

Delivered as:	Red liquid
Odour:	Characteristic
Density (20°C):	1.14 g/ml
pH value (undiluted, 20°C):	<1
Mixability with water:	As desired

Application:

Fertenol

is a high-grade pickling agent with a gentle action for use on metal surfaces, including non-ferrous metals.

removes rust, mill scale and scale layers, metallic dusts or dirt.

contains effective acid inhibitors that protect the bare metal from attack.

protects against metal embrittlement.

is diluted with 1 part of water for use in an immersion bath. The duration of treatment is determined by the degree of contamination. Thorough rinsing with water is required after treatment. Another treatment with a neutralising agent may be needed afterwards to prevent renewed rusting.

Safety:

The warning printed on the label and the safety advice in the **Safety Data Sheet** must be followed.

Classification: C: Causes burns, R34

Xi: Irritating, R37

Identification

GHS05 Corrosion

GHS07
